Jarvis 101

Jarvis is a subscription service which aims to make your life easier by handling all your chores.

- Cleaning (vacuuming, mopping, dusting, bathrooms etc)
- Housekeeping (changing sheets, laundry, drying/ironing)
- Miscellaneous chores (dog walking, light gardening)

Experienced, Dependable People

Jarvis housekeepers have backgrounds in either residential cleaning, housekeeping or hotel-keeping, and need to keep a rating of 4.2 stars or above.

Comprehensively Screened

All our friendly Jarvis housekeepers are trusted members of your local community, and are police-checked and carefully vetted before stepping foot in a client's home.

And Insurance-Backed

Jarvis Insurance (provided by Lloyd's) covers Jarvis housekeepers for personal injury or property damage caused while cleaning or handling errands.

Feel free to get in touch with the team here, at 1300 695 278 or at our app at

MAKE A BOOKING!

We'll organise a time that works in best with your schedule - from 8am to 7pm Monday to Sunday!

Preparing for your visit

The first visit will be a meet and greet with your Butler. There will be 15 minutes of briefing time and then they'll go ahead with the clean - if you want to pass on a key this is also a great chance to do so!

Our butlers use clients' cleaning equipment - it always helps to have this ready, and to pass on instructions to your Butler (in person or via our app) about where they can find it and where to return it.

If you're happy to continue with your Butler, we'll automatically roll you onto our three-month subscription! You're welcome to pause the service or adjust your visit hours or needs at any time.*

We hope to hear from you soon!

Our Story

Founded in 2006 by Christian Vanek and Scott McDaniel, the company was built on two main principles:

- ✓ Clients and employees first
- ✓ Powerful data solutions to meet business and research needs of all types

"Here at SurveyGizmo, we are in the business of storytelling through visualized data and information, and there are important stories businesses need to tell each day to succeed, even if it may not seem as obvious as it should."

The Problem

Business professionals need a concise, easy way to collect, manage, analyze and share data.

Price
for software should be
all-inclusive with no hidden
fees or additional charges

Usability
is often a pain point – the
software should be as easy
to use and inviting as it is
robust and intuitive

Centralization
is fundamental – professionals
don't want to purchase multiple
software platforms to solve their
data-based needs

THE VALENCE SOLUTION VS TRADITIONAL OUTSIDE PROCESSING

The Valence advantage lies in our single-source processing solution. As the largest independent aerospace product finishing company, Valence provides a one-stop source, saving time, transportation costs and product risk.

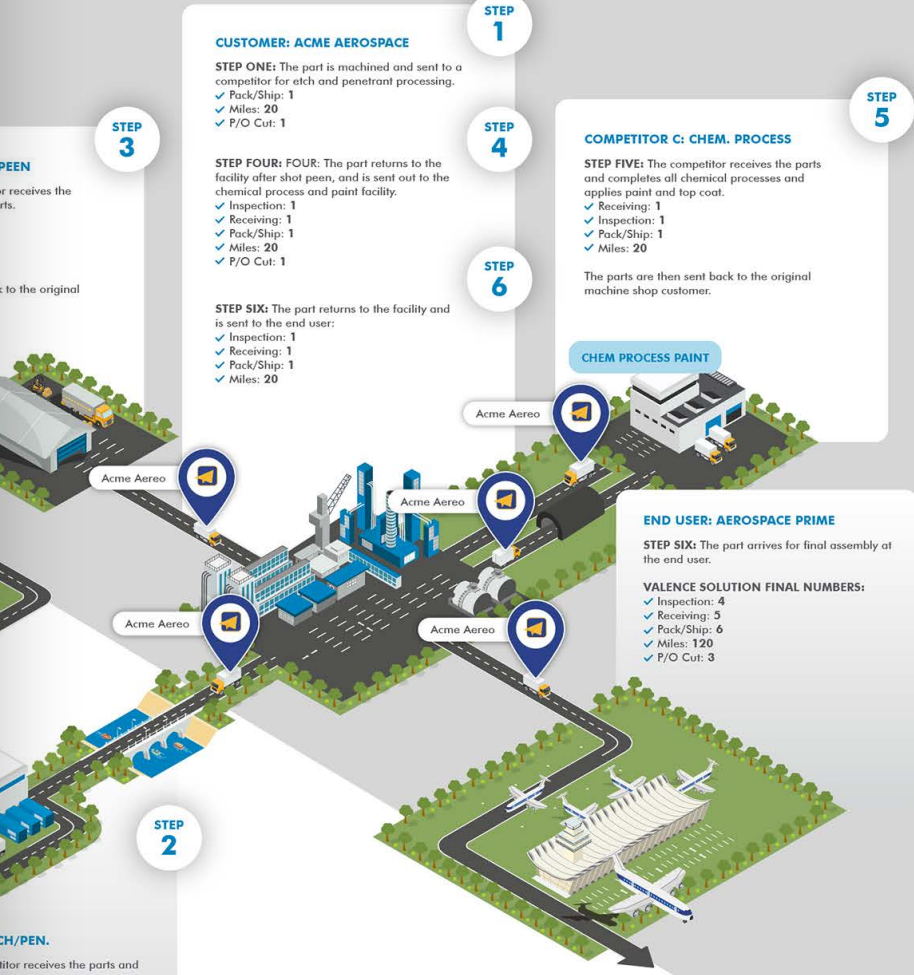

Traditionally, components are moved between different vendors for steps before final assembly. This causes damaged parts, increased lead times, cost inefficiencies, and customer headache. Valence is the only company that offers a single partner, highly efficient, fully integrated solution.

What is SEO and why it's important to your business

SEO stands for Search Engine Optimization. It's how your website gets traffic—for free—from the results pages on major search engines. When someone does a search, results like websites, videos and local listings are shown and ranked based on what the search engine considers to be the most relevant to the searcher. Paid ads appear up top, followed by organic results. You want your business to appear as high on this list as possible, so you can get more clicks and get more customers. SEO is the key to making that happen.

Think about how often you click away from a site in the middle of an article before checking out. Lots, right? That's because it just isn't easy to get products you want them to do. Now think about how many websites you've signed up for. Do you have a Dropbox account? How about PayPal? Or Pinterest? Each of these is likely a result of a compelling call to action (or CTA). The copy and design of the campaign. They're what makes the difference between the curious and the customer. Pages help you make them as effective as possible.
